

PHARMACEUTICALS (PTY) LTD

Contract Packing and Manufacturing

Capacity available for a wide range of products including Pharmaceuticals, Personal Care and Home Care products

Contract Packing and Manufacturing

Established several years ago as a member of the Acorn Group of Companies, Acorn Pharmaceuticals has grown into a highly productive and efficient business unit, registered with the South African Pharmacy Council and licensed by the Medicines Control Council (MCC). By keeping up to date with industry benchmarks in its field, this compact yet well equipped plant is geared to manufacturing and packing a wide range of products to international Good Manufacturing Practice (GMP) standards.

Acorn Pharmaceuticals was originally set up to manufacture Tabard insect repellents, one of the group's flagship brands and an acknowledged best seller in its category in many African countries. Additional products were soon added to its repertoire and today the facility is able to share this expertise with a number of established brands. With its proven track record, skilled and reliable workforce, thorough understanding of manufacturing practices and the business environment, as well as its variety of packing capabilities, Acorn Pharmaceuticals has become a partner of choice to a select group of discerning clients.

Benefits of utilising Acorn Pharmaceuticals for outsourced manufacturing:

- All operations in the plant take place under MCC approved conditions in an air-conditioned, air-pressurised, clean environment
- A variety of packing capabilities are available, including creams, lotions, aerosols and tablets
- Owner-management and experienced staff ensure consistently high standards
- State-of-the-art laboratory on site: Acorn Laboratories provides full service analytical capability to clients in the food & beverage, pharmaceutical, agricultural and cosmetic industries
- Situated in North Riding, which is easily accessible from all major business centres in Gauteng, the plant provides a convenient, cost effective local manufacturing solution
