

SABS 20825

BLUE ORANGE RED VERSATILE DETERGENTS

Teepol Blue 825, Orange, and Red are clear liquid detergents containing a blend of surfactants. **Teepol Blue 825** being a "high active" product complying to SABS 825 and carrying the SABS mark. **Teepol Orange** being a "medium active" detergent with **Teepol Red** as an "economically active" product. Each of these quality detergents combine the properties of wetting, dispersing, and emulsifying agents. They are neutral and therefore non-corrosive to all types of surfaces and materials. These products are readily soluble in either hot or cold water and easy to rinse. Being unaffected by hard water they are non-toxic and biodegradable.

All three products are extremely versatile detergents covering a multitude of applications e.g. the cleaning of all surfaces ceramic, glass vinyl, leather, plastics, PVC stainless steel etc. Making them ideal for use on floors, walls, windows, bathrooms, motor vehicles etc.

DIRECTIONS FOR USE

Depending on the degree of soiling the recommended concentrations are as follows.

BLUE 825

0,5% to 1,0% (0,5 Litre to 1 Litre per 100 Litre of water)

Orange

0,5% to 2,0% (0,5 Litre to 2 Litre per 100 Litre of water)

Red

1,0% to 3,0% (1 Litre to 3 Litre per 100 Litre of water)

Teepol Blue 825, Orange, and Red may be used for the purpose of removing soiling off metal parts. In such applications a concentration of up to three times the above and hot water may be required.

PRECAUTIONS

Teepol Blue 825, Orange, and Red will not cause skin irritation when used as recommended. However where prolonged contact is likely, protective gloves should be worn especially by people with sensitive skin.

Copies of SABS Certification and NOSA hazardous substance record form 2.17 are available on request.

PACK SIZE 4X5 Litres, 25 Litre, 200 Litre containers.
