GERMICIDAL

SANITISING DISINFECTANT

Teepol Germical is a detergent disinfectant based on quaternary ammonium compounds compatible surfactants and builders. The product complies with the requirements of SABS 639-1974 and carries the SABS mark. Used as a general purpose anti-bacterial, anti-fungal detergent. The product can be supplied in either a perfumed or unperfumed form.

Teepol Germical perfumed is used in application where unpleasant odours may still be present even after the area has been disinfected. It can be relied upon to deodorise bathrooms, refuse areas, food storage areas, kennels and any other areas where obnoxious smells may develop.

So that taste is not effected **Teepol Germicidal** unperfumed is recommended as a disinfectant where food is prepared. as recommended Teepol Germicidal gives a 99.9% kill rate of the following organisms.

Pseudomonas aeruginosa
Escherichia coli
Staphyococcus aureus
Trichophyton interdigitale
